

^{IQ}CAD/BIM Bridge – Awaken Data to New Life

Infrastructure companies are often not aware of the valuable information slumbering in their CAD plans. Slumbering inaccessibly. Here ^{IQ}CAD/BIM Bridge offers innovative ways of mining the knowledge hidden in the huge mountain of legacy data and then keeping it up to date further on.

Reliable inventory documentation is a key basis for planning the allocation of budget and other resources and for simulating operations. ^{IQ}CAD/BIM Bridge provides you with information about your fixed assets at the push of a button. And the tool reveals its real strength as a bridge to BIM environments.

^{IQ}CAD/BIM Bridge delivers data on asset inventories, with previously unseen precision. Consistently up to date. The tool orchestrates and harmonises key data interfaces, for instance from construction to building or between maintenance and operations.

The benefits at a glance:

- ≡ Bridge between the CAD environment and internal systems
- ≡ Prepares the way for a BIM process
- ≡ No resurveyings needed
- ≡ Enables reliable asset documentation
- ≡ Enhances efficiency of all dependent processes

Cuts operating costs

^{IQ}CAD/BIM Bridge brings legacy inventory data to new life

Infrastructure companies have valuable plans and data lying waste and unused. Usually huge amounts kept for decades, which unfortunately are incomplete and not fully reliable. ^{IQ}CAD/BIM Bridge awakens CAD plan inventories to new life, giving them reliability and eliminating the need for resurveying.

Soft interfaces with suppliers

^{IQ}CAD/BIM Bridge allows new data from surveyors, architects and other professionals to be imported without risk into your technical databases.

Efficient operation and maintenance

^{IQ}CAD/BIM Bridge ensures that interlinked data and information flows between CAD plans and internal asset management systems are kept consistent. And at the same time efficient.

Such CAD plans with an 'IQ boost' are objective and reliable and provide a case for budget resources.

Strategic benefit

"BIM me up, Scotty"

^{IQ}CAD/BIM Bridge provides the best possible preparation for meeting the BIM specifications required by the European Parliament.

In brief

Incomplete legacy documentation of asset inventories locks up resources at many levels. The solution: optimally link and update data using ^{IQ}CAD/BIM Bridge.

Benefit from cost-savings and inventory data you can build on!

Our company: IQSOFT

Since 1999 IQSOFT has been developing innovative IT solutions that put our clients ahead of the competition. As its main focus, the company is dedicated to the digital transformation of enterprises responsible for infrastructure.
